

# Call for Papers (ICPM in Nagoya, Japan)

## The 4th International Conference on Production Management

**Schedule: September 7-8, 2019**

**Conference Theme:  
“Production Management in SDGs Age”**

### **Spirit of Theme:**

The Sustainable Development Goals (SDGs) are the blueprint to achieve a better and more sustainable future for all. Social innovation is the process of developing and deploying effective solutions to challenging and often systemic social and environmental issues in support of social progress. Social innovation in the phase of SDGs is pursued in this conference. Various kinds of technologies have been innovated, applied, transferred and connected ubiquitously throughout the world. Today manufacturing, services, and agricultural sectors need to adapt technologies to make goods and provide services which are fast, affordable, and for the benefit of mankind. Moreover, technologies need to be quickly applied to increase productivity in all sectors and improve environments for the well-being of the world’s population. The thinking behind escalatory technologies need to be re-assessed, trained and applied in new ways.

### **Sub Theme Tracks:**

Operations and Supply Chain Management	Management and Society	Information Technology
